**Honeywell Forge | HCE | ACT Pharma video script**

125-150/words per minute, 1.8-2.1 minutes total

Scene	Voiceover Wordcount: **273**	On-screen text	Visuals + Notes
1. Intro	Introducing Honeywell ACT Pharma. Advanced compliance tracking across the pharmaceutical supply chain.	Honeywell ACT | Pharma Regulatory Compliance Solution	https://www.honeywellforge.ai/us/en/products/warehouses/act-pharma-for-tatmeen#end-to-end-stakeholder-enablement Mobile device & computer, scanner & printer (See sharepoint .PDF image reference)
2. Why	Over a billion people depend on medications to live longer, healthier lives. But more than 1.25 million deaths per year are caused by counterfeit medications. Governments are expanding track-and-trace regulations to improve safety by preventing fraudulent pharmaceuticals from entering the global supply chain. UAE Pharma Tatmeen Regulation requires compliance by all downstream stakeholders, from all lines of distribution to the point of sale.	1B+ people 1.25M + deaths per year UAE Pharma Tatmeen Regulation	Global population with medicine, populates then diminishes/shadows with bad medicine Follow a vile of medicine across supply chain: - Being boxed and palletized - Leaving a distribution center - In transport - Delivered to a pharmacy
3. How	As an experienced track-and-trace solution partner, Honeywell quickly enables end-to-end stakeholder integration and compliance with minimal impact on daily operations.	x	Emphasize/highlight connection of stakeholders
4. What	Sign up for the ACT | Pharma mobile app. Scan and serialize all items in EPCIS format to capture and report on all product movement, and quickly validate responses from the Tatmeen platform. You'll gain operational efficiency and achieve compliance to protect the consumer and build trust. Honeywell's cloud-based SaaS continually delivers added value through automatic updates by maintaining accordance with evolving regulation requirements, and, through our strategic partnership with Evoteq, by constantly testing and adapting solutions that reflect the needs of all stakeholders. Additional value-add functionality empowers businesses with more complex business processes to:	Web API & mobile EPCIS **SaaS Value-add:** - Updates with Tatmeen compliance - New feature roll-outs (Honeywell + Evotech logos) **Advanced Value-adds:**	**Refer to 'How it Works' graphics:** **Show persona-based log-in** Mobile device – Android and iOS **Show scanning/reporting of a few events at various points of stakeholder capture:** (Demonstrate QR code scanning and show the associated report message being delivered to the Tatmeen platform and validated): - Receiving - Dispensing - Identified as damaged/destruction **Honeywell's cloud-based SaaS**

	- Better manage inventory demands - Reduce loss by tracking products down to the smallest traceable unit - Enable efficient recalls when needed by tracing pharmaceuticals back to the point of origin - Integrate with SAP and other everyday tools to extend business capability	• Inventory • Reduce loss • Recalls • ERP integration	 **Show app-to-cloud SaaS connection to back-end business processes for added benefits:** - Evolving regulatory compliance - Product adapting to stakeholder needs - Inventory - Scaling down to smallest unit on supply chain - Pharma recalls - Integration / amplification of business tools/capabilities
5.
